

Dearest colleagues and singers!

I would like to present you a revolutionary discovery called the BIOPHYSICS of a 7, 13 and 33-dimensional space in which we live (more at www.ati-e-import.si).

If I told you that because of this discovery you could become top rank singers or teachers of singing with less work and practice, that would be a lie. But it is connected to the conditions of work. When you become familiar with this superb BIOTECHNOLOGY, you have all the means of getting top rank results. In this prologue I present you some things I have noticed during the usage of this technology in my teaching and recreating and which I am using as the first in the world.

The discovery denotes two types of rays which influence our physical and psychophysical condition. The rays are named Alpha as the rays of life and Beta as the rays of death. The latter are the most frequent in our environment as man directly influences their dispersion and strength with building the wrong buildings and infrastructure, designing the wrong kind of jewelry, objects, internal equipment, vehicles, gadgets etc. The consequence of this until now unknown phenomenon is a generating of a noxious static and dynamic BIOCYBERNETIC transformation that is slowly and effectively destroying the psyche and body of every human being. Which means that if we put an erroneously created object, building or piece of jewelry into these rays, the strength of ALPHA rays diminishes and the strength of BETA rays grows. This goes on until one day the ALPHA ray is turned off and a big BETA ray of 4.24 metres or its multiple is made. That is how deserts are created.

Just because of our carelessness and ignorance the rays of life are diminishing. The rays of death on the other hand are gaining power and are the cause of all the diseases of the psyche and the body, of all the problems of our time.

This discovery enables us to reactivate the Alpha rays using a measuring system for a multidimensional space (BIOCYBERNETICS), a seeing (SGBCD) and our perception. The Alpha rays enable a reanimation of our spirit and the body. The consequences can be seen in our voice and the superbness of our recapturing.

There are different techniques of relaxing, techniques of helping the mental abilities, the agility of the body etc. Unfortunately all this may be useful on a short term but the consequences for a majority of persons can be, shall we say, catastrophic. Why? Because they don't know the nature of the ray they are in. The new G-ALPHA technology enables the conditions for a LONG TERM achieving of excellent results, the achieving of eternal health and super psychophysical condition with no down side effects.

Therefore this is about creating excellent conditions with the help of which your voice works differently and better. The colour of the voice is nicer and softer. The voice has a greater freedom and flexibility. The intuition is enlarged to unknown proportions. Because of these conditions I notice at my students a faster caption of the technical sides

of singing, a larger capability of concentration, faster learning. The differences between the given content and the captured knowledge are negligible, because knowledge

accumulates quickly and therefore there are almost no oscillations. This is of a large meaning also for those with problems of anxiety, which disappears entirely. We know how important health is to a singer. With this technology we smooth our immune, hormone and genetic systems in a way that sickness phases pass in two to three days without using any medicine. You won't notice any overload of mucus in the region of the tonsils and the throat, stomach pains will disappear as will headaches, worries and a great many other things that you notice yourselves depending on the problems you are having at that moment, be it in your health, business or private life.

Have you ever asked yourselves why it is hard for you to perform some parts and songs, why you use too much time to learn a part, why you are afraid of a single tone that awaits you in your performance, why you repeat endlessly a text you just can't remember, why you need a hundred things before your performance to calm down, why in some halls you feel good and in some you don't, why you change your mood, why you can sing one performance easily one time and have problems the next, why some students can't progress despite their talent, why some can't sing anymore after their fifteen minutes of fame, why there is a lot of depression, alcohol, drugs and other forms of addiction among artists, why some worse singers have better successes than you despite your great technique and voice, why you are always just a little late, why you have the feeling that you can't move on from a standing point???

Pedagogues should be Alpha orientated and should be capable of this technology. That is how they would help form superb singers who would, because of the conditions, act soothingly to their listeners. If a pedagogue isn't Alpha orientated everything will go wrong as the energy is shared amongst the teacher and the student. If a professor is better than his students that will show in their success, but if he doesn't have the proper biocybernetic ability, he will slowly burn out and various forms of psychophysical illnesses will occur.

If the student is better than the teacher that will show in a slower development of the students.

To illustrate this I can quote a situation I witnessed myself.

A very talented and perspective student learned singing from a Beta orientated teacher. When he was accepted in school, his voice was ringing and nice, the first year there was visible development. After three years of schooling the voice lost all its beauty and charm. Let me mention that the technical knowledge of the teacher was very good and the problem wasn't that the voice of the student wouldn't develop because of that. But simply enough due to the Beta influence the teacher wasn't capable of hearing correctly and channel him to evolve into a superb singer.

I emphasize again, our ignorance of the influence of Beta death rays is so strong and hidden that we become aware of it only when we become professionally capable and start

anew with Alpha conditions. We realize the blunder we have been living in for many years when we experience this.

Music can influence our body and psyche in different ways. It is important to know the composer's biosystem, where and when the piece of music was made and finally in what kind of place the composer died. All of this influences the recreator and leaves marks on our body and psyche.

We can see how badly we damaged our bioystem in a series of Bioparametres measurable with a measuring system. All damage truly emerges in the long term and is evidence of this unconscious influence.

Every stereotype about the reason that things don't work out is a hoax. Classical medicine and also alternative medicine heal the consequences of problems. Unfortunately the disease has already evolved and the psychophysical problems have already arisen.

But this technology enables you to prevent the appearance of heavy cases of psychophysical diseases.

It is essential that this technology enables us to be born healthy and to die healthy.

I ensure you that the origin of all the stated problems is elsewhere than you imagine. With basic Biocybernetic protection (BC laser, BC shutter and at least one Alpha ray) you can guarantee yourself standard conditions to begin your psychophysical regeneration and connected to that, more successful artistic work.

We singers help listeners to forget their worries at least for some time and relax. But if this experience is joined with supremacy and a soothing sensation, which this technology enables, the contentment of the listener and the recreator is even larger.

Author: prof. Alenka Slokar Bajc, email: slokar.bajc@siol.net

The essential point of my discovery and a comparison with other technologies, medicine and pharmacy.

1. I have discovered the existence of three types of rays in nature: the BETA death rays (7. dimension), ALPHA life rays (13. dimension) and the S-ALPHA regenerating rays (33. dimension).

Nobody has defined this so systematically and with such precision. Actually I have discovered the origin of all the problems of our time, of all the diseases of the body and the psyche and the complete G-ALPHA BIOTEchnology for solving all of the problems that have occurred until this moment on Earth.

A most important fact is also that the S-ALPHA rays can be used in 33 and more different ways – projects.

I have labeled this usage as projects AP01 to AP33. This is a professional use of S-ALPHA BIOTEchnology intended for professional medicine, pharmacy, chemistry, science and technology and RELIGION.

2. I have realized that there exists a noxious static and dynamic BIOcybernetic transformation and a healing static and dynamic BIOcybernetic transformation. The first is caused by wrongly designed objects and BETA death rays, the second by rightly designed objects and ALPHA life rays.

3. I have labeled the use of BETA rays the G-BETA BIOTEchnology that our civilization mostly uses which is why everything goes wrong. That is why there are almost physically non-breachable obstacles on the way to a healthy life and health, luck and bliss.

The problem of health can't be in any case solved with chemistry and pharmacy. If something gets solved it is completely coincidental and with the use of ALPHA life rays.

4. I have called the use of ALPHA life rays the G-ALPHA BIOTEchnology.

5. I have labeled the measuring BIOTEchnology G-ALPHA and I have realized what is necessary for the right seeing of the work of black magic and the healing and noxious BIOenergies. I have labeled all of this as a Slovenian global BIOcybernetic diagnostic (SGBCD), with the help of which we can, in a few moments, get to know globally all that we need for a healthy life, personal security and protection.

The **BETA** generated BIOSystems, i.e. a sick spirit in a healthy or sick body, see the multidimensional problematic completely wrong. They see the bad as the good and vice versa. That is the fundamental origin of all the blunders of human work and creation and everybody that deals with the borders of the known. A great majority, if not everybody that deals with the borders of everything known are the victims of a BETA intelligence

that works through its mechanisms as an effective BIOphysical drug. It causes high addiction and all of the illnesses of the body and the psyche. All the alternative healings belong here.

The **ALPHA** generated BIOSystems, i.e. a healthy spirit in a healthy or already sick body see the multidimensional space the right way.

The G-ALPHA **Measuring BIOTEchnology** therefore reveals all the blunders of the human spirit and creation. The measurements are always repeatable and the use of G-ALPHA technology can be learned by any averagely intelligent human being.

When physical measurements are not satisfactory or when they do not discover anything, when new problems present themselves and the old ones are badly solvable or don't have a solution at all, we have to recur to the use of BIOcybernetic measurements. These discover all the problems of our time, all that has been until now hidden to the modern measuring systems and gadgets, all that has created our unsatisfactory illusions of life on Earth and its long term rightly orientated evolution.

6. We have to be aware of the existence of active intelligence on Earth, presented by Man and that of a passive intelligence which all the other BIOSystems on Earth have. These are viruses, bacteria, microorganisms and others, and animals, plants and earth.

The mission of man is therefore perfectly clear. He has to take care of a long term correct evolution of all the BIOSystems. But that is not possible without a basic knowledge of the BIOphysics of a 7, 13 and 33-dimensional space.

All the BIOSystems have in common the measuring BIOTEchnology G-ALPHA with which we can measure at least 1128 BIOparameters. These reveal completely all the technically technological and medical problems, the problems of food, water, pesticides, chemical samples, the designing of objects, gadgets, vehicles and systems from the point of view of usage and the noxious consequences for the BIOSystems. The measurements can be made for the past, present and future lapse of time.

7. I have discovered that the ALPHA rays are layered in nature every 5 metres north – south and every 3.5 metres east – west. In the middle of this shape there is one ray made by the edges of a basic ASG-ALPHA net (5x3.5). This is so under the condition that the ALPHA ray hasn't been turned off yet and that it has a diameter of 0.84 metres.

If the ALPHA ray is already turned off, which is the making of a spiritually impotent man, a man fully impaled with the noxious BIOenergies, I have named him a BETA generated BIOSystem, the location changes into a 4.24 metres large BETA death ray. Around every ALPHA ray there is in average six BETA death rays. The procedure of the turning off of ALPHA rays goes on.

That is how a noxious location of great diameter begins and in the end a desert is formed. The whole procedure of destroying life on Earth is actually a consequence of the conscious or unconscious use of black magic which is now measurable and provable.

8. I have labeled the whole technology of building objects and infrastructure that enables the generating of a healing BIOclimate of seven healing BIOenergies. The existing noxious G-BETA BIOTEchnology generates four noxious BIOenergies which are the cause of all the addiction of the body and the psyche, all the problems of our time.

I have labeled this as BIOCybernetic crime which causes BIOTerrorism, all together cause all the diseases of the body and the psyche, stress, alcoholism, taking drugs, suicides, homicides, traffic and other accidents, violence, crime, terrorism and wars.

9. We must ask ourselves right away, who channels and supervises the working of BIOphysics of the 7, 13 and 33-dimensional space in which we live. In my understanding of the discovery these are the three superintelligences. They are the BETA (seventh dimension), ALPHA (thirteenth dimension) and the S-ALPHA (thirty-third dimension) which control completely the physical problematic of life on Earth. There is also something extremely complex above these mechanisms which can't be controlled anymore with the discovered measuring G-ALPHA technology. Obviously there is a control system that exceeds the average intellectual capabilities of our civilization of our time and works in the fifty-third dimension to which we can access only with telepathy and in certain conditions.

Who can access these intelligences is easily measured with the help of the new measuring BIOTEchnology. That is also extremely important for the choice of superb personnel in all the regions of human work and creation.

10. The workings of all these mechanisms can be observed with the help of the Slovenian global BIOCybernetic diagnostic (SGBCD). We can observe what is going on at birth and death. What goes on at the interpretation and listening of music, news, watching TV, at conferences, round tables etc. We can also observe the workings of black magic and its influence on the psyche of the participants. That is the use of the noxious seventh dimension which in my understanding works as a sort of natural selection.

11. A special chapter is the working of **BIOparasites**. They are samples of noxious BIOenergies generated by incorrectly deceased BIOSystems.

These glue themselves to live BIOSystems. Once they are glued to the body, they penetrate deeper and deeper until its destruction – all the way to the vital organs that they damage. Actually, we could say they are the souls of BIOSystems of active and passive intelligences on Earth that have died in noxious BETA death rays. All the viruses, bacteria and microorganisms also have souls, which is measurable with the new superb measuring BIOTEchnology G-ALPHA.

12. **Addiction** to noxious BIOenergies has the effect of the body not being able to clean itself of the noxious BIOenergies by natural way and therefore deceasing.

The mechanism works as a sort of blockade of our brain levels so they can't access the higher dimensions, up to the 7., 13. and 33. dimension. That enables the activation of ALPHA life rays and their use for the reanimation of the body and the psyche and for all the other activities made possible by the projects AP01 to AP33.

13. I have discovered that food, drink, medicines, cosmetics, all materials, objects etc. contain lots of noxious BIOenergies and a series of noxious chemical wastes, all of which destroy the human BIOSystem. With that they are destroying the whole population of the Earth through the damage of the genetic, immune and hormone systems which is now elegantly and easily measured.

That is why all faked ignorance and propaganda of the quality of products is useless as it is actually a misleading of the customers.

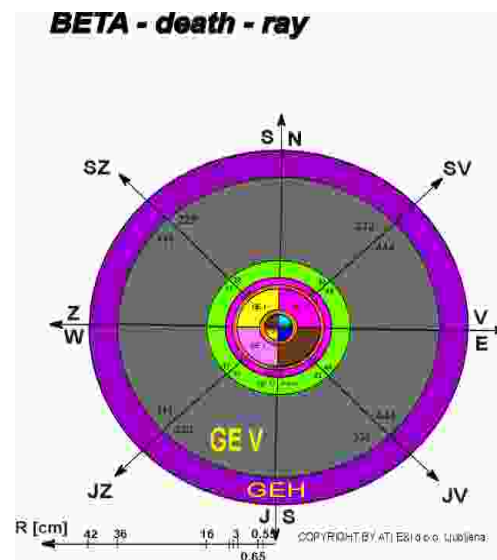

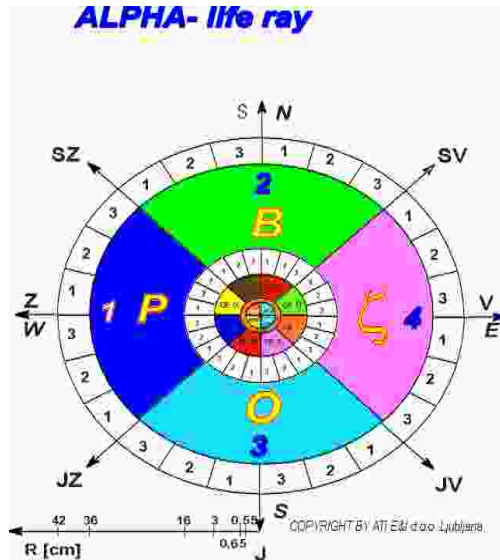

Only when food, drink, medicine, cosmetics and all materials are cleaned with this technology do things get their true Bio value. That is provable by measurements.

I teach some details in 6 month seminars in Ljubljana.

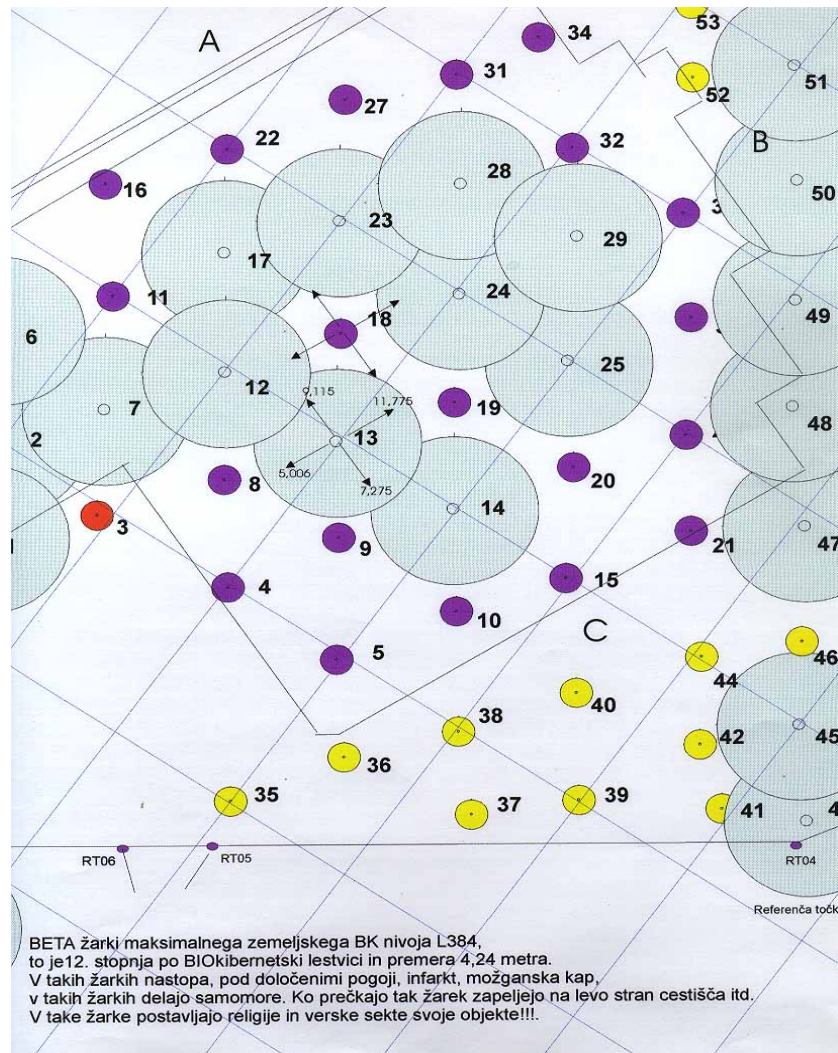

Author: Slavko Alojz Gorenc, independent researcher, 1000 Ljubljana, Pod bresti 29, Slovenija

A graphic reconstruction of some elements of BIOphysics of the 7, 13, and 33-dimensional space in which we live

1. ALPHA life ray and BETA death ray

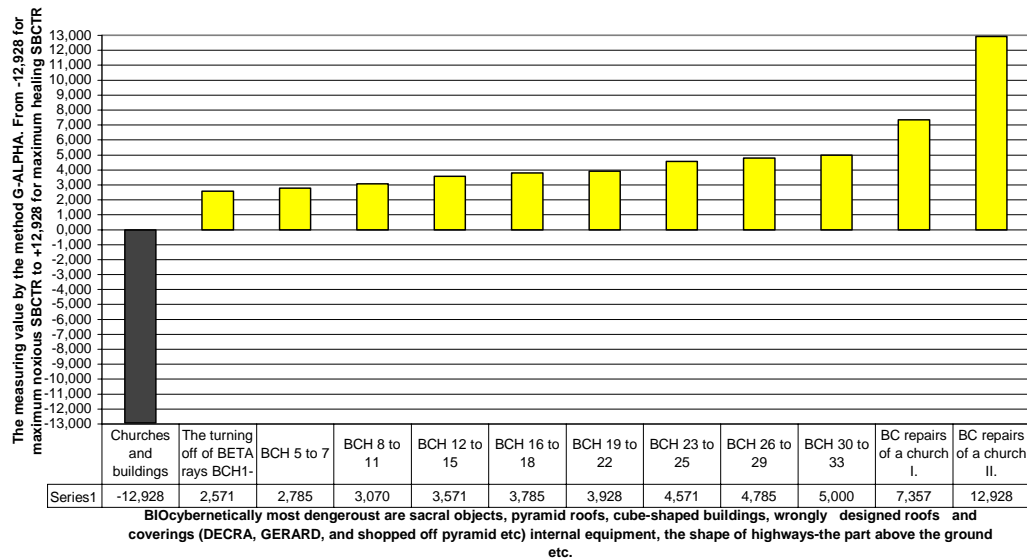

4. A group of BIOcybernetic loops the size of 4.24 metres where the ALPHA rays are already turned off. Inside a location like that there is a highly noxious BIOclimate of four noxious BIOenergies. Beta rays on a location like this usually reach the maximum level of L384 which is the 12. level on the BIOcybernetic scale.

5. The growing of a healing BIOclimate in dependence of the amount of activated ALPHA rays:

Most buildings are made in such a way that they are creating a highly noxious BIOclimate of four noxious BIOenergies. When the BETA death rays are turned off, when we activate a single ALPHA ray inside the open BIOcybernetic loop, everything changes dramatically.

We can generate the healing BIOclimate of the seven healing BIOenergies only with Slovenian method G-ALPHA in such a way that we are turning off the BETA death ray.

6. Typical generators of the noxious BIOclimate are 3 and 4-edges pyramids, the sphere, a cross with sharp edges, a cube and cubic shapes, all the symmetrical shapes, smooth straight polished surfaces, power plant posts, transformer stations, pyramid fences, roof coverings in a trapeze shape, DEKRA, GERARD etc., roof accessories in the shape of cones and other pointy shapes. Extremely dangerous for the BIOSystems are also many wrongly built churches, business buildings, malls, most of the mobile phones (because of their noxious shape) etc.

Because of the foolish building of buildings and infrastructure of noxious shapes there is usually a maximum level of the BIOclimate of the 12. level of the BIOcybernetic scale.

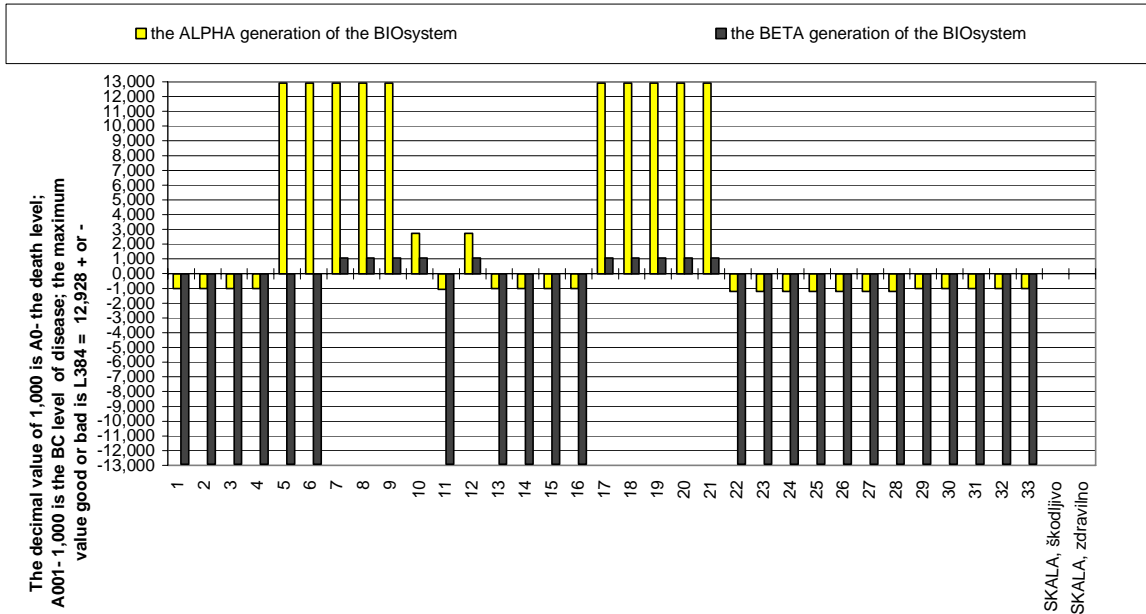

7. If the roofs have an 8-edges pyramid shape, things are totally different. These can generate healing BIOclimate up to seven healing BIOenergies if the conditions are right. The conditions can be arranged by a spiritually evolved man.

8. I have labeled two kinds of BIOtechnologies. The first is the noxious G-BETA BIOtechnology. It uses BETA death rays and a noxious static and dynamic BIOcybernetic transformation while the lately discovered G-ALPHA BIOcybernetic BIOtechnology uses the healing ALPHA life rays and a healing static and dynamic BIOcybernetic transformation.

9. The measuring system defined by the Slovenian BIOcybernetics enables the measuring of 1128 BIOparametres. The BIOenergies and ensuing BIOparametres that very thoroughly outline every BIOSystem on Earth are strictly defined. Everything is strictly defined.

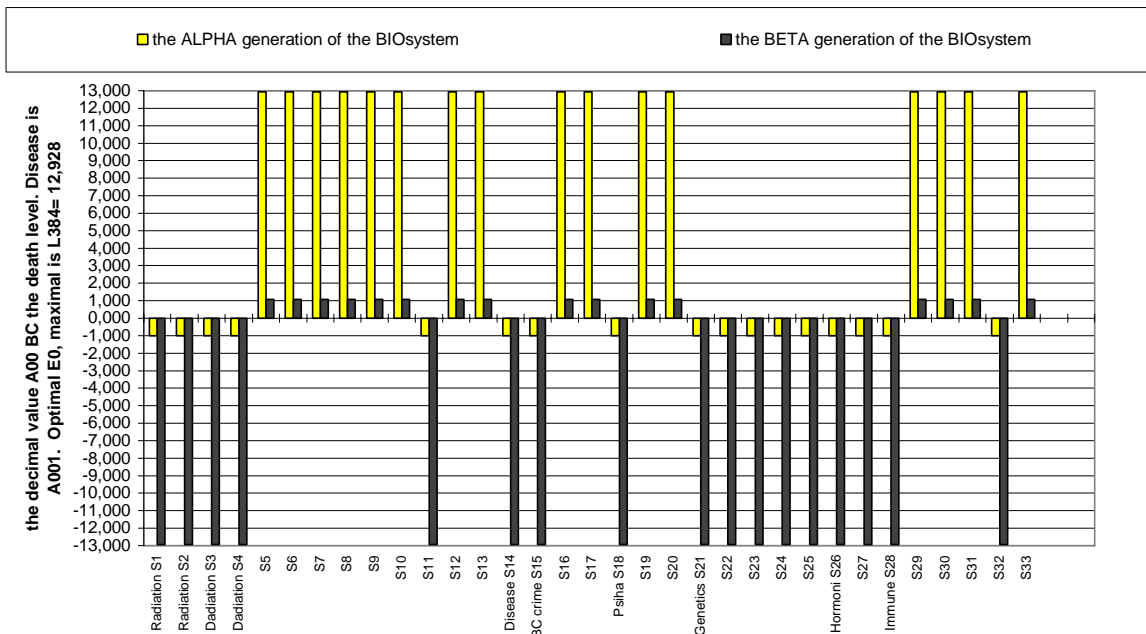

10. A graphic illustration of an ALPHA and BETA generated BIOSystem

The basic BIOcybernetic diagram D13, using theSlovenian G-ALPHA method

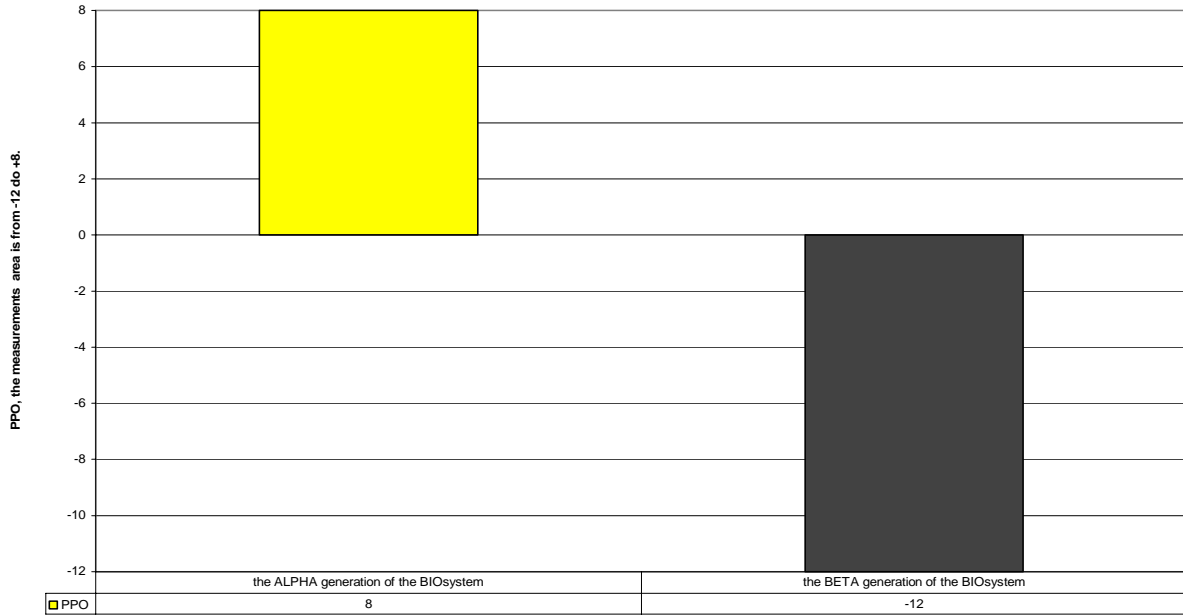

the 33 basic BIOenergies: no.:1-6 death rays cause damage;13-16 noxious BCTR; 22-28 food, drink and medicine; 29-33 is the status BC of wounds and disease; 10 the influence of ALPHA; the influence of BETA; 12 the influence of S-ALPHA; 17-21 brain BC lev.

The expanded BIOcybernetic diagram D33 = S1 to S33 using the Slovenian metod G-ALPHA

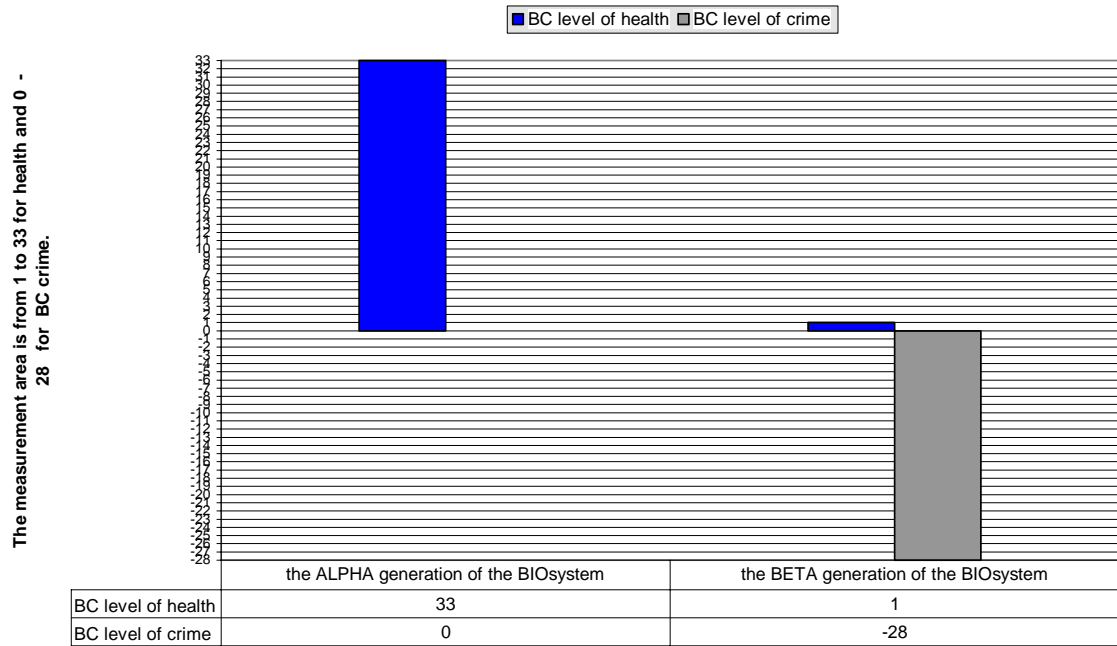

The Measurement of 1089 BIOparametres. the healing are positive, the noxious negative. The immune system S28, genetc S21, hormone S26, brain damage S18, disease S14 and S15.

Predisposition for right choices "PPO" (business, political, partnership, medical, etc).

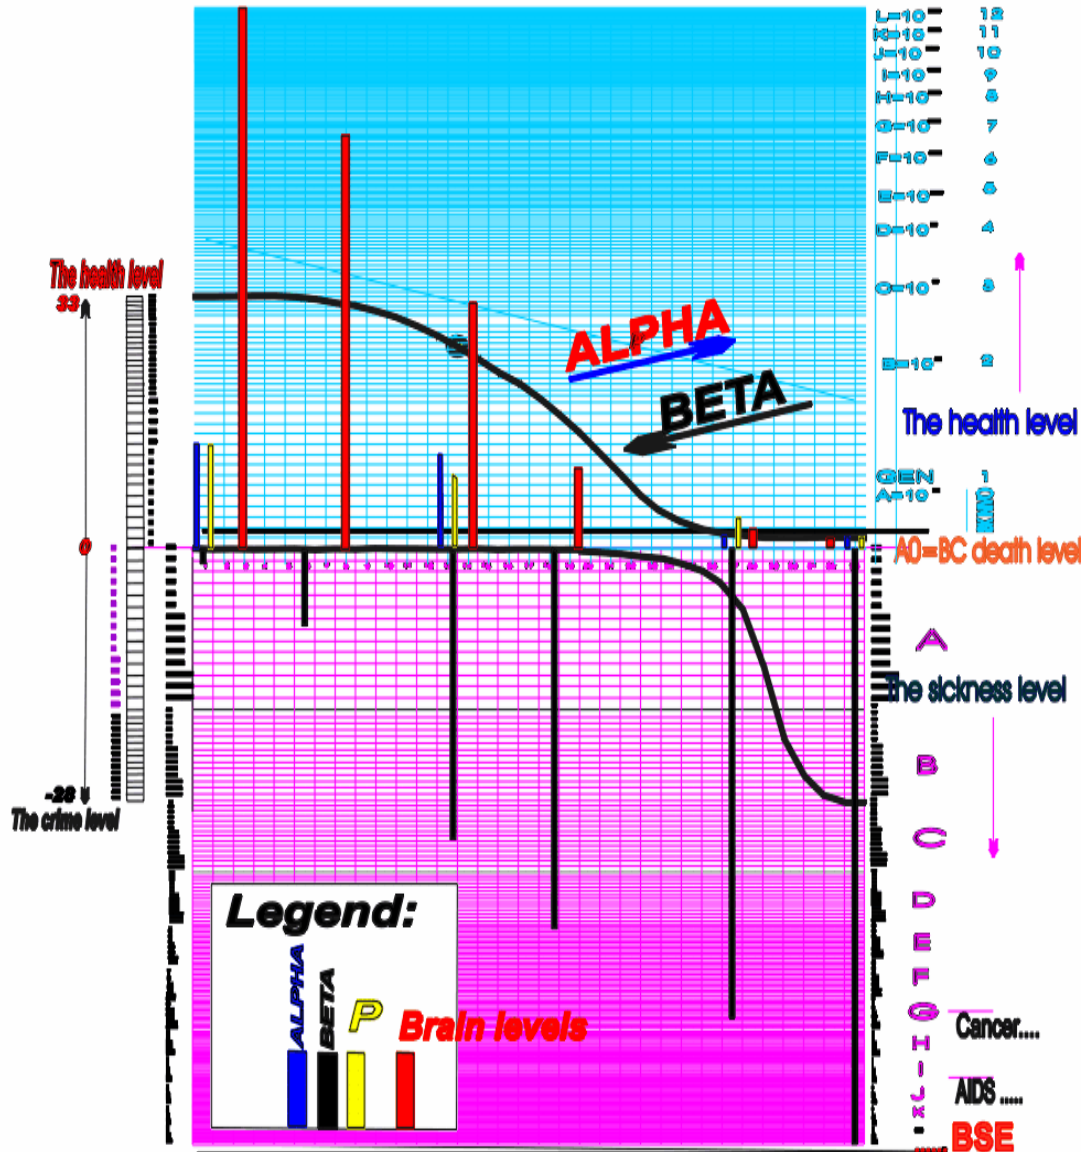

The Biosybernetic level of health and the BC of crime caused by the location

The BC level of crime means continuous exposure of the body to BETA death ray and the influences of the noxious BC transformatio, the consummation of noxious BC food, drink and medicine.

The proces of the BC level of health and crime in dependence of ALPHA BETA and P

The BIOcybernetic protection and the needed knowledge of BIOphysics of the 7, 13 and 33-dimensional space which we live in, necessary to every human being:

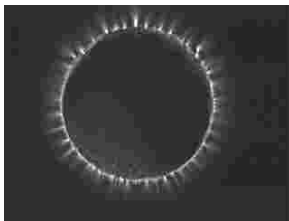

1. the BIOcybernetic shutters for the left and right temple and if needed also for the backbone
2. the BIOLaser of the 1. 2. 3. or 4. level
3. A cartridge object for under a hat, helmet (important for motorbike drivers etc.)
4. At least one activated ALPHA life ray
5. The use of the ALPHA ray by the G-ALPHA 1,2,3,4 method.
6. The tools for the maintenance of ALPHA rays
7. The protection against BIOparasites is the use of project AP33 that enables the BIOtransfer. That is a teletransport of the BIOparasite from the 7. to the 33. dimension where it belongs.

For top rank sports, experimental institutes, music halls, church buildings, the government, the parliament, food, drink and medicine warehouses etc. we have to generate at least 33 ALPHA rays and have at least one person who is able to use the ALPHA rays and projects AP01 to AP33 professionally.

In the BC shutters there are encoded the healing BIOenergies of the maximum BC level, that is the 12. level on the BC scale. As soon as we glue the BC shutters to our left and right temple, a positive AURA generates. Most people have a negative AURA. The point of BC shutters is the protection of the brain before the noxious static and dynamic BIOcybernetic transformation.

The BIOLaser protects us when we pass through or stand in a BETA death ray. It has a series of other properties as there is a pattern of the maximum healing BIOenergies of the 12. healing level of the BIOcybernetic level encoded in him.

BC shutters. A photo of the radiation of the BIOenergies encoded in the shutter.

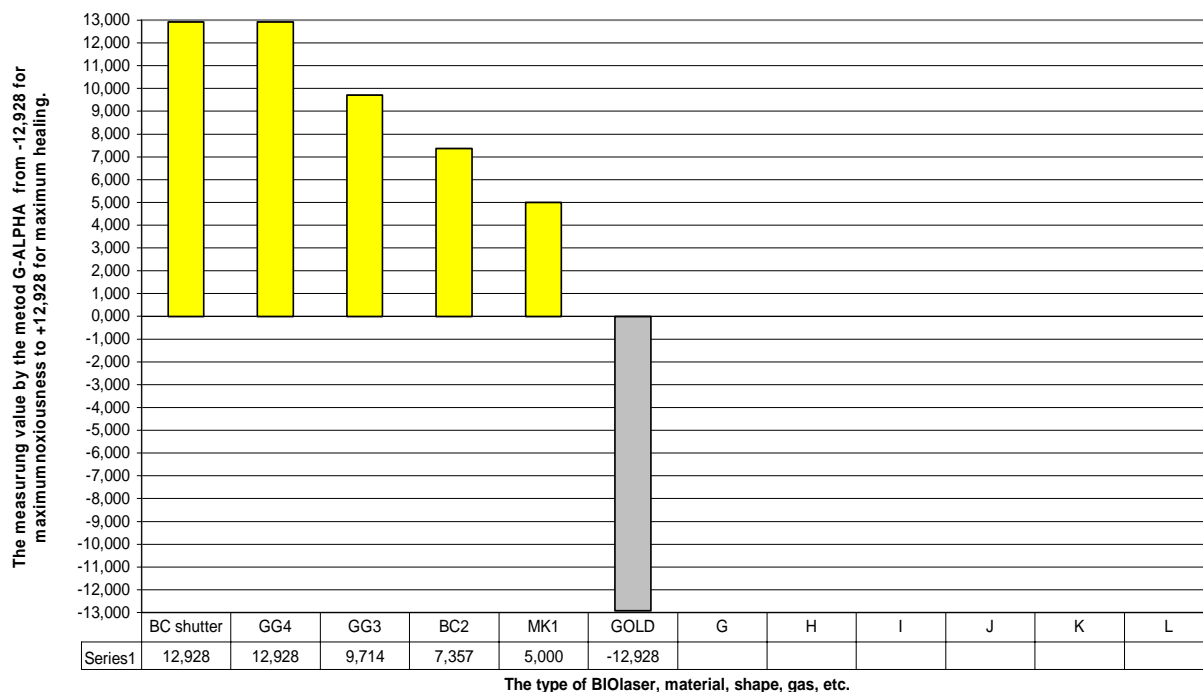

BIOLasers:

A Diagram of the field of BC protection MK1, BC2, GG3 and GG4

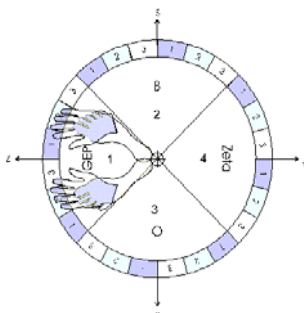

A BIOcybernetic test for BIOlasers, BC shutters and other

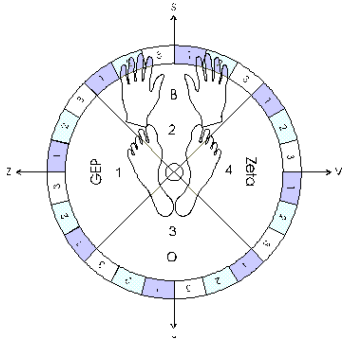

The Slovenian G-ALPHA method 1,2,3,4, location of the legs and arms in the ALPHA life ray:

The method has eight parts.

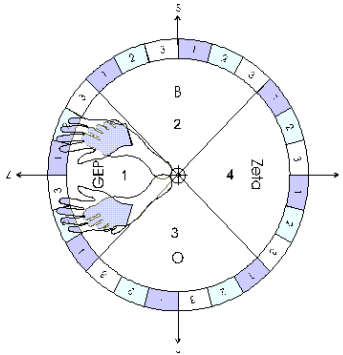

1. The application for the location of the ray. We count to 13 and think I am coming to the ray:

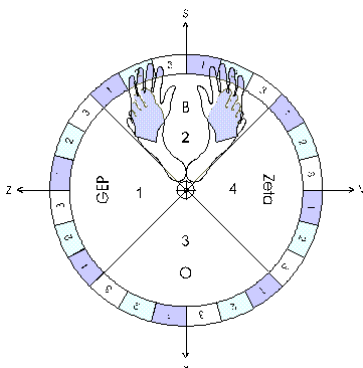

2. The activation of the ALPHA ray for use by the G-ALPHA method 1,2,3,4. We count to 133.

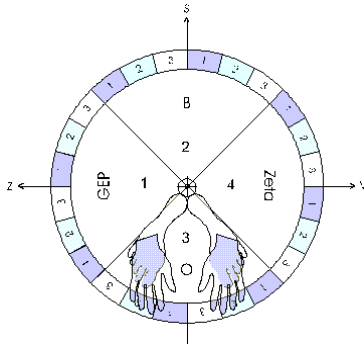

3. The use of the ALPHA ray western quadrant which cleans the body of noxious BIOenergies. We count to 133.

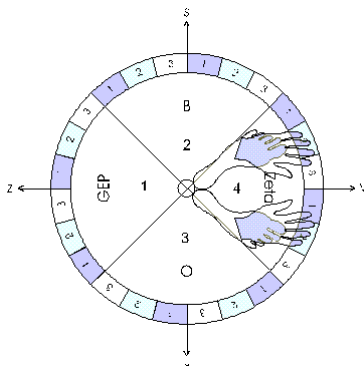

4. The use of the northern quadrant of the ALPHA ray. On this location the ALPHA rays encode in the body the healing BIOenergies. We count to 133.

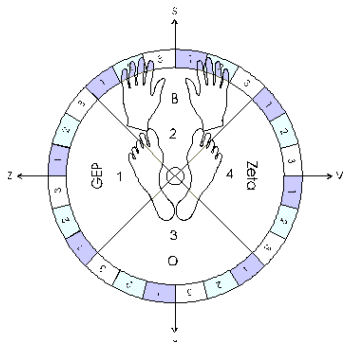

5. The use of the southern quadrant of the ALPHA ray. On this location the ALPHA rays encode in the body the healing BIOenergies. We count to 133.

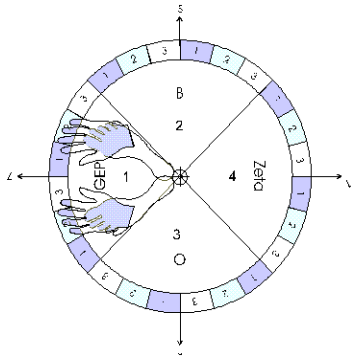

6. The use of the eastern quadrant of the ALPHA ray. On this location the protecting BIOcybernetic belt, the positive AURA is encoded into the body, the skin and all the cells. We count to 133.

7. We clean the ALPHA ray behind us. We count to 133.

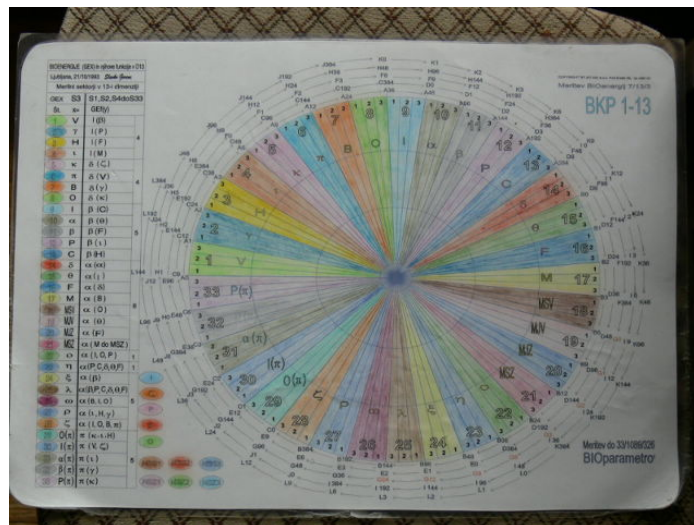

8. We log out of the location of the ALPHA ray. We count to 13.

The Slovenian S-ALPHA 1,2,3,4 method.

The location of the body in an ALPHA ray is the same as with the G-ALPHA 1,2,3,4 method. The difference lies only in the fact that we have to learn how to readjust the ALPHA ray to the projects AP01 to AP33. This is enabled by a BIOModel in which are written all the necessary BIOCybernetic codes that enable the manipulation of the ray and its usage for the healing of all the known and unknown diseases of the body and the psyche.

The BIOModel for the readjustment of the ALPHA ray to the AP01 to AP33 projects.
